

An issue about RegExp escape sequence

发件人: 我自己的邮箱<958268052@qq.com>

时 间: 2020年2月20日(星期四) 晚上10:29

收件人: quickjs-devel<quickjs-devel@freelists.org>

Version: quickjs-2020-01-05

Testcase:

```
var NISLFuzzingFunc = function(){  
    var regex = new RegExp("/{1ab}");  
    print(regex);  
};  
NISLFuzzingFunc ();
```

Command:

quickjs-2020-01-05/qjs testcase.js

Output:

SyntaxError: nothing to repeat

Expected output:

/{1ab}/

Description:

There are two ways to use "{}" according to ES10, one is quantifiers, the other is RegExp Unicode Escape Sequence. For the second usage, however, if the sequence inside {} is start with a number, an exception is thrown. Maybe this is an issue of Quickjs.

Best Regards,

Livy
